SCULPTCOR[®] textured panels are a patented thermoformed system that takes inspiration from diverse elements and forms found in nature. The system is fabricated from non-porous, durable, stain-resistant, and easy to clean solid surface. The wall panel sizes are

24"x64" nominally and are presently available in three standard patterns: **Twist**, **Wave** and **Smooth**. Additionally, you can design your own custom pattern.

SCULPTCOR[®] textured panels can be utilized in a variety of project applications such as wall panels, column covers, retail facades, elevator cladding, case-work, ceiling panels and furniture. Panel reveals can be specified either **straight** or **curved**. Special panel sizes are available. **The largest uncut pressed panel size available is 29.5" x 72"**
