

The **Modular Vanity™** System is designed to handle the rigorous environment of a public restroom.

Created by ASST, this innovative wall hung vanity system utilizes a sturdy aluminum and polyethylene support structure with a thermoformed 1/4" thick removable (solid surface or resin) front panel allowing for easy access to plumbing. The vanity system is available in 30" wide increments and includes both a backsplash, side panels and a **DuPont Corian® #810** integral sink bowl.

### Advantages:

- ADA compliant design
- Easy to clean, simple lines with no exposed fasteners
- Rot resistant wall hung tubular aluminum and polyethylene support structure
- Can be fabricated from 1/2" thick solid surface or resin materials
- Removable 1/4" access panel provides access to plumbing
- Durable, stain resistant modular design
